

Responsive Web Testing Documentation

Objective

This testing was performed to verify that the websites are responsive and function correctly across different viewport sizes, including desktop, tablet, and mobile devices.

Test Environment

Item	Details
Browser	Google Chrome (Version 147.0.7727.56)
Testing Type	Responsive UI Testing
Tool Used	Chrome DevTools
Operating System	Windows 11 (64-bit)

Tested Websites

- 1) [Forkify QA Academy](https://forkify.qa-academy.eu/)
URL: <https://forkify.qa-academy.eu/>
- 2) [Dinner Demo Website](https://test-dinner-eng.demohoster.com/dinner.html)
URL: <https://test-dinner-eng.demohoster.com/dinner.html>
- 3) [Atelier Photography](https://www.atelier.com.bd/)
URL: <https://www.atelier.com.bd/>
- 4) [Amazon](https://www.amazon.com)
URL: <https://www.amazon.com>
- 5) [Wikipedia](https://www.wikipedia.org)
URL: <https://www.wikipedia.org>

Viewport Sizes

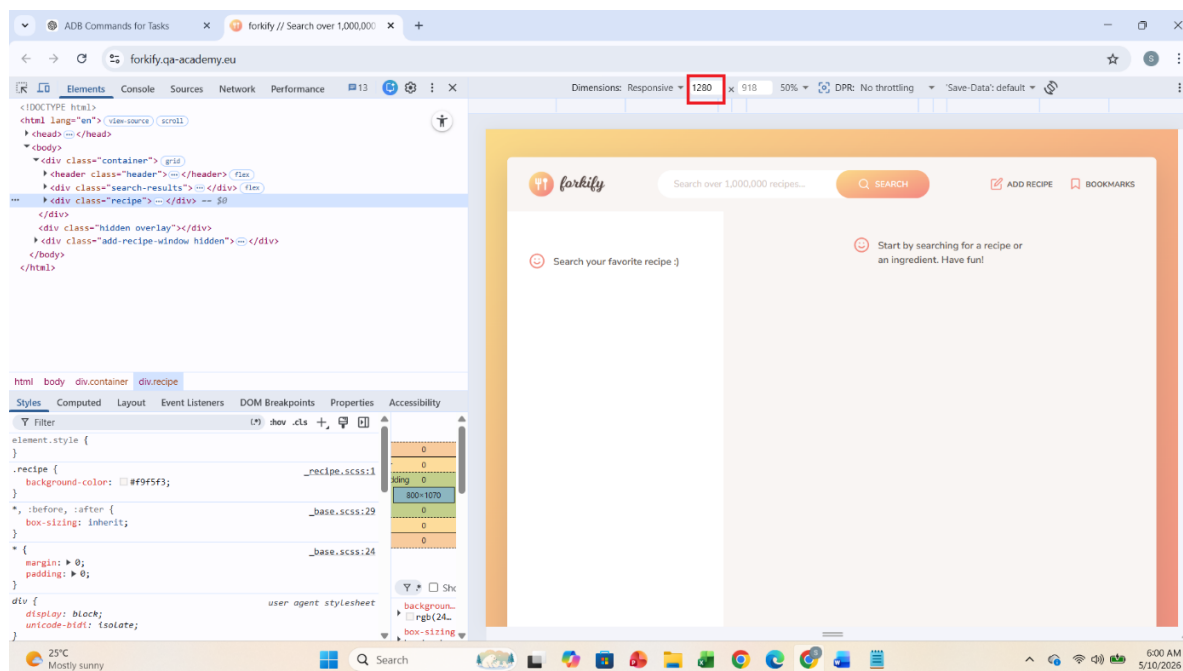

Device Type	Width
Desktop	1280px
Tablet	768px
Mobile	375px

Testing Activities Performed

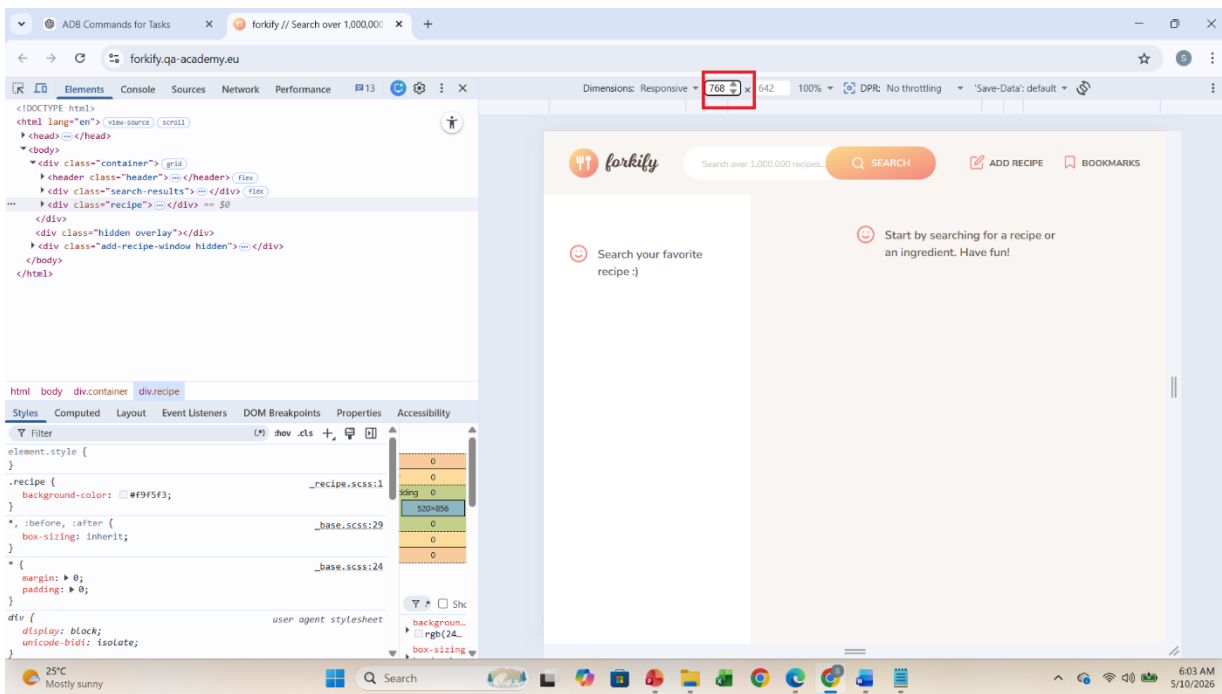

- 1) Loaded all websites successfully in Google Chrome browser
- 2) Verified responsive behavior across all required viewport sizes (Desktop: 1280px, Tablet: 768px, Mobile: 375px)
- 3) Checked that no layout issues, such as overlapping, breaking, or misalignment were present
- 4) Ensured all key elements (navigation, images, text, and sections) were visible and properly aligned
- 5) Tested basic functionality of the websites
 - a. Verified buttons were clickable and working correctly
 - b. Verified links were functioning and redirecting properly (where applicable)
- 6) Captured screenshots for each viewport of every website
- 7) Collected browser logs using ADB logcat commands for debugging and evidence
